Abstract: Owners and operators must notify EPA of construction modification startups, shutdowns, malfunctions, and data and results of performance test. Owners/operators must continually monitor and record temperature in specified pollution control devices. EPA determines parameters to be recorded in other control devices upon description of that device by the source.

Form Numbers: None.

Respondents/affected entities: Asphalt processing and roofing manufacturer facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart UU).

Estimated number of respondents: 144 (total).

Frequency of response: Initially, occasionally and semiannually.

Total estimated burden: 33,912 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$8,557,168 (per year), which includes \$5,240,000 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is no change in the labor hours in this ICR compared to the previous ICR. This is due to two considerations: 1) the regulations have not changed over the past three years and are not anticipated to change over the next three years; and 2) the growth rate for the respondents is very low, negative, or non-existent. Therefore, the burden hours in the previous ICR reflect the current burden and are reiterated in this ICR. However, there is an adjustment decrease in the respondent cost and an adjustment increase in the Agency cost due to an update in labor rates.
